

# Medical Professional Panels

An array of drug testing options for healthcare providers

## The Importance of Being Drug-Free

Medical professionals, by the very nature of their jobs, have access to a number of prescription drugs. We rely on our medical professionals to make critical decisions about our health and well-being, and there's little doubt that those decisions are best made while free from the influence of alcohol, illegal and prescription drugs.

## Expanded Testing Options

Quest Diagnostics is a trusted partner in the healthcare industry. As a leading laboratory, we also support a drug testing business primarily focused on the employer market. The same safety, productivity and return on investment benefits that employers gain from helping to ensure drug and alcohol-free workplaces can also be applied to employers in the healthcare industry. While alcohol, illegal and some prescription drugs are commonly tested in the employer market, because of their employee's access to a wider variety of prescription drugs, a number of employers in the healthcare industry leverage the expanded testing benefits of our Medical Professional Panels (MedPro).

## Customized Screening Programs

Our comprehensive and highly customizable mix of drug and cutoff-level panels enables our healthcare customers to confidently target both illegal 'street drugs' and the areas of specific risk based upon access to prescription drugs.

## A Leader in Toxicology Testing

### Rapid, Reliable Results

The base MedPro panel is performed using immunoassay technology (EIA and ELISA) for all analytes, ensuring fast turnaround times. Screening for additional drugs is performed using mass spectrometric technology (GC/MS and LC/MS/MS).

### Convenient Customization

Medical professionals at your facility may have access to a specific combination of drugs for which you might like to monitor. Our broad array of testing panels provides a variety of options and cutoffs that cater to your specific needs.

### We're There When You Need Us

We're committed to answering your questions, ensuring that your program runs smoothly and showing you that we're there when you need us.

Base Panel	
<b>Amphetamines</b>	
Amphetamine, Methamphetamine	300 ng/mL screen
<b>MDA Analogues</b>	
MDMA, MDEA, MDA	250 ng/mL screen
<b>Barbiturates</b>	
Amobarbital, Butalbital, Pentobarbital, Phenobarbital, Secobarbital	300 ng/mL screen
<b>Benzodiazepines</b>	
Alprazolam Metabolite, Clonazepam Metabolite, Flurazepam Metabolite, Flunitrazepam Metabolite, Lorazepam, Midazolam Metabolite, Oxazepam, Nordiazepam, Temazepam, Triazolam Metabolite	100 ng/mL screen
<b>Narcotics</b>	
Codeine, Hydrocodone, Hydromorphone, Methadone, Morphine, Propoxyphene Metabolite	300 ng/mL screen
Oxycodone, Oxymorphone	100 ng/mL screen
<b>Other Drugs</b>	
Cannabinoids	50 ng/mL screen
Cocaine Metabolite	300 ng/mL screen
Phencyclidine	25 ng/mL screen
<i>Ethyl Alcohol and EtG are optional (EtG confirmatory testing includes Ets)</i>	
Panels can be customized by adding additional drugs:	
<b>Narcotics</b>	
Meperidine and/or Metabolite, Tramadol	100 ng/mL screen
Fentanyl	300 ng/mL screen
Meprobamate	200 ng/mL screen
Butorphanol, Ketamine and/or Metabolite, Nalbuphine, Naloxone, Naltrexone and/or Metabolite, Pentazocine	100 ng/mL screen
Buprenorphine and/or Metabolite	5 ng/mL screen
<b>Antidepressants</b>	
Amitriptyline, Nortriptyline, Fluoxetine and/or Metabolite, Sertraline	100 ng/mL screen
<b>Antihistamines</b>	
Chlorpheniramine, Diphenhydramine, Doxylamine, Pheniramine, Brompheniramine	100 ng/mL screen
<b>Stimulants</b>	
Diethylpropion, Ephedrine, Methylphenidate, Phenmetrazine, Phendimetrazine, Phentermine, Phenylpropanolamine, Pseudoephedrine	500 ng/mL screen
<b>Other Drugs</b>	
Zolpidem	100 ng/mL screen
