I recently completed a multi-year post-doctoral fellowship program under Dr. Barry Sample, which prepared me for my current role of Scientific Director at our Atlanta facility. During my fellowship, I learned by rotating through the forensic toxicology laboratory and from working alongside people who care deeply about what they do.

This hands-on education gave me a unique perspective on our business. Our teams perform at exceptionally high levels to meet rigorous standards for accuracy, quality, and turnaround time. Yet, as we continually evaluate our processes, we discover the best ideas and solutions often come from our frontline employees. As we work to shape and improve our future, I'm proud to work for a company that's willing to listen and partner with those at the very core of our business – our laboratory professionals.

Dr. Steven Sykes

Scientific Director
