To continually provide the most accurate drug testing, our team stays current on the latest research, technology, and trends in forensic toxicology. We cross train in various areas of the laboratory to develop new skills and to expand our technical abilities. Championing the client always remains more important to our team than an individual's achievement, and we have found that as we improve ourselves, we are in turn, better able to serve our clients.

As a scientist, I believe in lifelong learning. Like many of my peers, I'm a member of the National Registry of Clinical Chemists, take online educational classes, read books and articles, and welcome opportunities to get involved. Engaging in different experiences is a great way to learn and grow, and by gaining these experiences, we're better able to consistently deliver timely, reliable results.
